---

## PROFILE

Growth and GTM operator with a product-builder background. Recent Glenmont Circle work includes taking B2C app ideas from research to launch readiness: positioning, ASO keywords, competitor teardown, onboarding review, landing pages, app listing copy, screenshots, QA, and release checks. Brings the useful mix for lean teams: clear writing, campaign thinking, CRM/workflow awareness, AI-native research, and enough technical ability to build the pages, demos, tools, and follow-up systems behind the campaign.

## SELECTED GROWTH & PRODUCT MARKETING PROJECTS

### Globotrotter

B2C app launch | 🔗 [GitHub](#) 🎥 [Demo](#) 📄 [Case Study](#) 2026 - Present

Travel app launch project for trip ideas, destination memory, itineraries, and progress loops.

- **Shaped the launch story** around travel memory, exploration, and playful progress instead of generic itinerary planning.
- **Built the go-to-market layer** across ASO keywords, competitor onboarding teardown, product copy, demo flow, and launch page thinking.
- **Connected product and marketing work** by using real app screens, user flows, and release checks to keep the message grounded.
- **Iterated with AI workflows** for research, copy variants, positioning angles, QA lists, and faster review loops.

### Clear Halal

Consumer app launch | 🔗 [GitHub](#) 🎥 [Demo](#) 📄 [Case Study](#) Jul 2026

*Consumer app launch project for scan-led halal product checks and clear decision support.*

- **Prepared the launch basics** across audience framing, ASO terms, listing copy, screenshots, demo page, and submission checks.
- **Turned a simple user pain** into clearer app messaging: scan a product, understand the result, and move on with confidence.
- **Worked through the full launch surface** from mobile UX and result states to store assets, landing page copy, and QA.
- **Kept claims practical** by tying marketing language to product behaviour, not vague AI positioning.

### RCA Flow

B2B workflow product | 🔗 [GitHub](#) 🎥 [Live Demo](#) 📄 [Case Study](#) Dec 2025

B2B SaaS demo for surveyor workflows, calculations, team review, and PDF reports.

- **Framed the commercial problem** as faster reporting, cleaner team visibility, and fewer spreadsheet-heavy handoffs.
- **Built the demo experience** around role-based workflows, admin review, CSV imports, calculations, and PDF output.
- **Turned an operational pain point** into a product story a buyer could understand quickly.
- **Shipped the working demo** on Google Cloud Platform in 13 days from requirements to deployment.

## WORK EXPERIENCE

### Glenmont Circle

*Growth & Product Marketing Operator*

*2024 - Present*

Part-time product studio role taking small B2C apps from research to launch readiness.

- **Owned app launch groundwork** across ASO research, competitor teardown, onboarding review, positioning, listing copy, screenshots, and release QA.
- **Built product-led marketing assets** including landing pages, demos, launch narratives, app store copy, and user-facing explainers.
- **Used AI-native workflows** to speed up research, copy options, campaign planning, QA checklists, and product marketing review.
- **Worked across product and GTM** by linking user flows, app screens, technical constraints, and customer-facing messaging.

### Kaush Media

*Founder / Web & Growth Marketing Consultant*

*Nov 2016 - 2024*

SMB web and marketing consultancy covering websites, landing pages, campaigns, and internal tools.

- **Delivered websites and campaign systems** across WordPress, Webflow, GoHighLevel, JavaScript, React, hosting, analytics, and integrations.
- **Worked directly with business owners** to turn loose goals into clearer offers, page structure, copy, lead capture, and launch plans.
- **Built lightweight marketing operations** covering CRM/funnel flows, content updates, email ideas, handover notes, and practical automation.
- **Owned client delivery** through scoping, stakeholder updates, quality control, launch support, and expectation management.
