

Utkarsh Kaushik

Product Engineer | iOS & Web Apps | Swift / React / TypeScript

✉ ukaushik@hotmail.co.uk London, UK 🇬🇧 UK Citizen 🌐 [GitHub](#) [LinkedIn](#) [Portfolio](#)

PROFILE

Product engineer who turns product ideas into working software. Recent Glenmont Circle work includes owning two iOS apps end to end: user flows, Swift build, API integration, testing, staging/production setup, release checks, and App Store submission. Brings strong product judgement, hands-on development, customer understanding, and practical delivery habits. Strong fit for teams that need a builder who can ship useful product, learn fast, and keep engineering decisions tied to real users.

SELECTED SOFTWARE PROJECTS

Globotrotter

iOS product + private demo | 🌐 [GitHub](#) 📺 [Demo](#) 📄 [Case Study](#) 2026 - Present

B2C travel product for trip ideas, destination memory, itineraries, and playful progress loops.

- **Built the product loop** from onboarding teardown and UX flows into Swift/iOS development and testing.
- **Prepared the launch layer** with ASO keywords, competitor analysis, listing design, and product copy.
- **Delivered the technical base** across API integration, storage, staging checks, and mobile-first UI.
- Kept a rapid product loop: choose the user outcome, build the useful slice, test, then improve reliability.

Clear Halal

iOS App Store submission | 🌐 [GitHub](#) 📺 [Demo](#) 📄 [Case Study](#) Jul 2026

Consumer iOS app for quick halal product checks and scan-led decision support.

- **Owned the product path** from competitor research and onboarding review to ASO keyword work.
- **Built the Swift/iOS flow** so a scan-led user journey could turn checks into structured results.
- **Prepared the release** with listing copy, metadata, screenshots, and submission checks.
- **Kept quality tight** through staging/production checks, testing, debugging, and release review.
- Used AI support carefully while owning judgement and final release decisions.

RCA Flow

B2B SaaS Product | 🌐 [GitHub](#) 📺 [Live Demo](#) 📄 [Case Study](#) Dec 2025

Multi-tenant SaaS for surveyor RCA workflows, calculations, and PDF reports.

- **Built role-based workflows** for owner, admin, and team-member users.
- **Turned spreadsheet work** into CSV imports, property records, calculations, and admin review.
- **Shipped operational paths** for edit requests, notifications, PDF reports, and review states.
- **Deployed the product** on Google Cloud Platform in 13 days.

WORK EXPERIENCE

Glenmont Circle

Product Engineer / App Developer 2024 - Present

B2C product role taking small mobile products from idea to release.

- **Owned app builds end to end** from user flows and Swift build to API integration and release prep.
 - **Built delivery habits** around staging/production separation, release checks, and test-first work.
 - **Prepared launch assets** with ASO keywords, competitor reviews, listing copy, and screenshots.
 - **Used design tooling** to sharpen onboarding, UI polish, and visual direction.
-

Kaush Media

Web Developer & Digital Consultant

Nov 2016 - 2024

SMB web and marketing consultancy covering websites, landing pages, campaigns, and internal tools.

- **Delivered websites and systems** across WordPress, Webflow, GoHighLevel, JavaScript, and React.
 - **Worked with business owners** to turn loose commercial goals into clear scopes and shipped pages.
 - **Shipped useful workflows** across campaigns, hosting, analytics, features, and small internal tools.
 - **Owned delivery** through stakeholder updates, launch copy, expectation setting, and quality control.
-

EDUCATION

MSc Performance Analysis

Middlesex University | Pass | 2012–2014

BA Business Management

Westminster University | 2:1 | 2007–2010

Full-Stack Engineering - Professional Development

FreeCodeCamp | 2020 | Scrimba | 2023 | Fortray | Jan-Sep 2026

SKILLS

Product Engineering: User flows, product scoping, frontend implementation, API integration, release readiness, issue tracing

Mobile & Web: Swift/iOS, React, TypeScript, JavaScript, Firebase, serverless functions, mobile-first UI, responsive screens

Engineering Practice: Git/GitHub, staging/production, test-first habits, CI/CD basics, release checks, regression checks

Backend & APIs: REST APIs, authentication, authorisation, Firebase Auth, Firestore, validation, structured data flows

Product Workflow: Discovery, competitor teardown, onboarding review, ASO keywords, app listing copy, user-value framing

AI-Native Workflow: Claude Code, Codex, Cursor, structured prompting, AI debugging, human review, safe iteration loops
